

Gas Station Price Display

- Clear under sun performance
- Display kit form for D.I.Y.
- Available in various digit sizes and colors
- Wireless remote control or computer control option

The **Gas Station Price Display** is generally supplied in kit form. There are various digit heights and colors for selection. Each Gas Station Sign will be controlled by a sophisticated built in controller with memory back up. The data on the display will be kept even power is cut off. Lines of digits can be integrated into a waterproof casing with front protective glass to serve as an outdoor indicator panel. It can be controlled via wired, wireless remote keypad, PC, or other communication options are available upon request. In order to ensure clear under sun and no blurred digit display during night time operation, auto brightness sensor option is implemented to ensure optimum visual performance throughout the day.

Technical Data

Line with 4 digits

Model	Color	Digit Height	Brightness
PD-404	R, A, PG, W	4" (100mm)	>5000 nits
PD-604	R, A, PG, W	6" (150mm)	>5000 nits
PD-804	R, A, PG, W	8" (200mm)	>5000 nits
PD-1004	R, A, PG, W	10" (250mm)	>5000 nits
PD-1204	R, A, PG, W	12" (300mm)	>5000 nits
PD-1804	R, A, PG, W	18" (450mm)	>5000 nits
