

The Digital Time Zone Clock

- Day light saving on individual Time Zone
- 12/24 hour format
- Choices of display colour & Time zones
- High precision +/- 2 min per year in stand alone working mode
- Atomic Clock accuracy with option synchronized to GPS or NTP Time Sever

It allows you to view multiple time at different places in the world and different time zones. We have developed high precision digital time clock models of 51mm (2"), 76mm (3") and 107mm (4") digit height which are capable to meet different in-house viewing environment. It comes with 4 digits in HH:MM and 6 digits in HH:MM:SS display format design and there is option to have either printed or programmable electronic text for Zone or City names identification. Date and Calendar display option in selectable display formats can be added to the Time clock as required. The clock can be operated in either 110VAC or 230 VAC 50/60 Hz.

Applications: Airports, public transport stations, conference rooms, shipping management companies, control and communication centres, trading rooms, travel agent offices and hotel lobbies

Model (4 digits) HH:MM	Model with Electronic text (4 digits) HH:MM	Digit Height	Time Zones	Colour
